

16 Tons of Greed

Description

Some say we need insurance companies
To run our healthcare any way they please
So whaddaya think, are they doing the job
Or does it make you wanna sob

Make 600 calls, and whaddaya know
Your claim is denied and youâ??re on your own
To save your life, would depress their bottom line
Nothing personal, of course, they hope youâ??ll be fine

Well, we say the marketâ??s OK for some things
Like deodorant, dishes, raincoats and rings
But the importance of good medical care
Means we really gotta make it fair

Making it fair for everyone
Means care for all, not only some
What the doc says you need, is what you should get
And not have to take on crippling debt

Weâ??d rather pay for healthcare than guns and bombs
Whyâ??s there always enough for the Pentagon
National health is the way to go
Weâ??d get better care, for the same dough

If Canada, Europe, and Japan
Also Cuba and Thailand
Could figure this out, whatâ??s wrong with us?
Healthcare for all

ITâ??S UP TO US [spoken]
