

Canada's Got No Labels On Our Food

Description

I got no labels on my food
To tell me if it's any good
Big business wants to make a buck
But we really think this sucks
CHORUS HI HO Not so merry o
I'm as worried as can be
Without labels on my food
I can't tell what's eating me
2) In England, labels are so clear
We need the same tough laws right here
The USA demands you say
What's in the food today
CHORUS
Mongolian fish genes in our beets
We don't think those are good to eat
Genetically altered soy
No good for girl or boy
CHORUS
We want to think our country's smart
And that our government has a heart
So let us label what we eat
These songs we will repeat
