## Climate Change Is Beyond Serious

Cli---mate change is beyond ser-i-ous.

That is why we're raisin' such a fuss.

If we want our planet to sur-vive

vote the Green New Deal to stay a-live!

So-o-me say that sci-ence is not true.

You can arg-ue with them till you're blue.

Ra-ther than just getting sad & bleak,

raise your voice and join us in the street!

Car-bon is ris-ing... Sky high!

Spe-cies are dy-ing... NO LIE!

End fossil fu-els... WE MUST!

Ex-tinction's com-ing... for US!

Gla-ciers are melt-ing... Seas rise!

For-ests burn up as... Earth fries!

Oil's not the an-swer... Wise UP!

If we don't stop, we're... Outa luck!

Trump and Pence must go, and their cronies

and all corp'rate neolib phonies.

We can't com-promise a-noth-er inch!

To save the Earth we must get off the bench!

Now we've only got a dozen years

**to** take **action**, before **our** worst **fears**

**come** to **pass**..... (*very slow*)-> **Thanks** to all **those** who **lie**.....

**if we don't act now we can kiss our butts good bye!!**
