

## Climate Change Is Beyond Serious

### Description

Climate change is beyond serious.

That is why we're raisin' such a fuss.

If we want our planet to sur-vive

vote the Green New Deal to stay a-live!

Some say that sci-ence is not true.

You can argue with them till you're blue.

Rather than just getting sad & bleak,

raise your voice and join us in the street!

Carbon is ris-ing! Sky high!

Spe-cies are dy-ing! NO LIE!

End fossil fu-els! WE MUST!

Ex-tinction's com-ing! for US!

Gla-ciers are melt-ing! Seas rise!

For-ests burn up as! Earth fries!

Oil's not the an-swer! Wise UP!

If we don't stop, we're Outa luck!

Trump and Pence must go, and their cronies

and all corporate neolib phonies.

We can't com-promise a-noth-er inch!

To save the Earth we must get off the bench!

Now we've only got a dozen years

**to take action, before our worst fears**

**come to pass!.. (very slow)-> Thanks to all those who lie!..**

**if we don't act now we can kiss our butts good bye!!**
