

Lyrics by: Rose DeShaw

Gaggle: Kingston

Tune: Paper Roses

Date written or updated:

Coming Down The Wind

(Brackets indicate where you could add a different issue)[Environmental laws] they have deceived us

With loopholes that we dumbly overlooked

[Now toxic burnings can be mixed with cement]

And downwind? Well, we guess our goose is cooked

CHORUS

Toxic burning! Waste emissions!

Oh how dangerous we know they be

But they're legal

And they're [Lefarge]

And they're coming down the wind, to me.

2) I moved way out of town to raise my children

So they could breathe the clean, crisp, country air

But now we've got a [cement plant with toxins]

Forgive me but it really isn't fair!

CHORUS

3) I pick my issues carefully, it's my time

Community concerns, our parks and schools

I never thought I'd have to come and stand up

To companies that make up their own rules!

CHORUS
