

Data Centers are Too Damn Big!

Description

When server farms come rolling in, Oh no! Oh no!

They use our water, power, and land, Oh No! Oh no!

They say itâ??ll boost our economy, but the jobs arenâ??t there, as we can see

And weâ??ll all go marching down â?? to the town â?? and the streets â?? where we meet

Dum dum dum, dum dum dum dum

The cooling towers drain our streams, Oh no! Oh no!

Millions of gallons of water it seems! Oh no! Oh no!

The power lines go on for miles, while lobbyists just laugh and smile

And weâ??ll all go marching down â?? to the town â?? and the streets â?? where we meet

Dum dum dum, dum dum dum dum

The neighbors raise their signs up high, Oh no â?? You donâ??t!

We will march and we will cry: â??Oh no â?? You donâ??t!â?•

â??We need clean air and stars at night, not a warehouse full of lights!â?•

As we all stand shouting loud â?? in the crowd â?? in the streets â?? where we meet

Dum dum dum, dum dum dum dum

The billionaires are not from here, they take, and take

They have no stake in our fair town, they take and take!

Half-time:

But we stay here with the noise and heat, our water needs we cannot meet

Our electric bills keep climbing high, property values descend, oh my!

*Billions of dollars but not for us! Environments damaged, it's all unjust. **Pause***

‘Cuz they’re too damn big, so,

We’ll keep marching on, and speaking out, and singing our song!
