

Fossil-Fueled Tragedies

Description

How many houses must floods wash away
Before we achieve clean energy?
How many wildfires must wipe out our towns
Before we say the heat is too high?
How many heat waves will it take 'til we say
Climate change is an existential threat?

CHORUS:

The last chance to curb fossil-fuel tragedies

The last chance to change is right now

We can't change the course of a hurricane
By drawing with a Sharpie pen
Silenced sci-ence as nature's fury grows
Leaves us rocked and shocked to tears
How many years did we waste idling by
As fossil fuel execs denied and lied?

CHORUS

How many wea-ther deaths must we see
Til fossil-fuel sub-sid-ies end?

Instead of changing climate on planet Mars

Let's work on healing planet earth

We must stand together in solidarity

The lives we save may be our own

CHORUS 2x
