

Gotta Shut You Down LANL (Los Alamos National Lab)

Description

LANL is building more atom bombs
gonna lead to annihilation
The people say NO! 'cause the people know
that the bombs are an abomination
It's against the law; United Nations law;
nukes have been outlawed; they are against the law
They poison our water, poison the air
with plutonium radiation
'Safety' they vowed, but they lied, so now
we're demanding a complete cessation
Cease and desist!
You don't know who you're harming
Cease and desist!
Don't have a right to endanger us
Goodbye to LANL, bane of the living!
Gotta shut you down or you'll blow up the whole world
Gotta shut you down or you'll blow up the whole world
Whoa, now our senators, both, and our governor, too
ought to know that they must protect us
Forget the federal bucks, 'cause plutonium sucks,
and remember that our lives are precious
Cease and desist!
You don't know who you're harming
Cease and desist!
Don't have a right to endanger us
Goodbye to LANL, bane of the living!
Gotta shut you down or you'll blow up the whole world
Gotta shut you down or you'll blow up the whole world
Gotta shut you down or you'll blow up the whole world
