

## Last Chance

### Description

How many homes will floods wash away  
Before we get clean energy?  
How many wildfires rage through the land  
Before we can make people see?  
How many deaths from the heat will it take  
Before we can simply agree?!

#### CHORUS

The last chance to end these climate tragedies  
The last chance to change is right now.

How many times will our leaders in charge  
Be driven by cruelty and greed?  
How many times will oil companies  
Continue to lie and mislead?  
How many years will we waste idling by  
As all of our grandchildren plead?!

#### CHORUS

The last chance to end these climate tragedies  
The last chance to change is right now.

Let's work on making our politicians see  
That all of us want a "green deal."  
Let's work together with joy in our hearts  
To help our environment heal.  
Let's work restoring this planet of ours  
And ring out our earnest appeal!

#### CHORUS

The last chance to end these climate tragedies  
The last chance to change is right now.  
The last chance to end these climate tragedies  
The last chance to change is right now.
