

**Lyrics by:** Lorna Drew

**Gaggle:** St John

**Tune:** Bless 'Em All

**Date written or updated:**

## **That Nuclear Plant**

It must go! It must go! The nuclear plant at [Lepreau}  
We're not ready yet for the ultimate end  
When the pipes have all rusted away  
The killing pollution will stay  
And pass radiation to each generation  
So our great-grandchildren will pay.  
2) It must go! It must go!  
That nuclear plant at [Lepreau]  
There's wind and there's water  
And that's what we oughta  
Be using or else we are going to go  
When you're out for a walk in the park  
Your partner may glow in the dark  
These rays are effective as a contraceptive  
And kissing may give off a spark!
