

## Three Hundred Fifty (Climate Song)

### Description

THREE hundred FIFty, What is that about? It's all about the Climate Now loudly we must shout  
Three-FIFty parts per million, and not a jigger more  
Cause our Planet just can't take it that's what we're shouting for!

OFF to Copenhagen our leaders they are bound  
If WE don't raise a ruckus they'll waste this precious round.  
We really have to push them, we have to take a stand  
So THEY will make an effort, and come up with a plan.

They love to have their photo ops, they love to make a show  
Pretend to limit gases, but really let them grow  
Protecting corporations what a dirty deal!  
Let's tell them now what WE expect Let's show them how we feel!

Canada's disgraceful we're not do-ing our share  
To cut back on pollution, to save our Planet fair  
We HAVE to take some action our footprint to reduce  
Come ON all worldly Leaders don't be so obtuse!

So ALL o-ver the country, and all o-ver the World  
On twenty-fourth October, the challenge is unfurled  
With lots of bright ideas and activities so clever  
If we DON'T face climate issues now, we fear it will be NEVER!

To see what's going on, go to three-fifty-dot-org  
From children to old Grannies, everyone's on board  
Sign on to our Petition, push POLiticians, all  
They HAVE to take some action Don't LET them drop the ball!
