

## Uranium Song

### Description

Chorus:

Oh my darling, Nova Scotia,  
Do you want uranium mines?  
Cancer-causing radiation  
Unleashed on you for all times.

No safe levels of exposure  
So the latest studies tell  
But our government's invested  
In the nuclear buy and sell.

At the mine they mill uranium  
Grinding radioactive ore  
Leaving most of the radiation — (spoken – STRONG VOICED MEMBER) 85%  
In tailings ponds for ever more.

No one knows how to trap these tailings  
For two hundred thousand years  
And radon gas drops deadly poisons  
We'd be wise to have some fears. (look fearful)

Ninety-nine percent of uranium  
Goes for weapons and for power  
And they both increase the danger  
That we'll kill all life on earth  
(choking cough, holding throat).  
Watch Marilyn for restarting song

Chorus

Oh my darling, Nova Scotia,  
Do you want uranium mines?  
Cancer-causing radiation  
Unleashed on you for all times.

In your granite, there's uranium  
Decomposing all the time  
To escape that radiation (draw back)  
Best to leave it underground (Motion downwards, following 'Director').
