

## Water is Life

### Description

This song is especially for areas where rain has been scarce. The rivers may be on the surface or below ground.

CHORUS The rivers are flowing  
And all of us knowing  
The rivers give water  
And water is life

But scarce is the rainfall  
To replenish the rivers  
Cause climate upheaval  
Distort Nature's plan

The creeks are cracking dry now  
Young trees are standing dead now  
Reservoirs soon may be empty  
But water is life

So turn off the tap now  
Save used water for the toilet  
A rainbarrel for the garden  
Each drop is a gem

CHORUS  
Keep toxins out of sewers  
That drain right into rivers  
Protect trees and wetlands  
That conserve the rain
