

Wind and Solar

Description

Wind and solar (2 times)

Wind and solar (2 times)

Wind and solar (2 times)

Wind and solar (2 times)

There are currently two big problems our nation has to face.
We need more jobs and less pollution to save the human race!
No more oil, coal or nuclear â?!.
The answer is now all too clear
Wind technicianâ??s the fastest growing job in our nation
and solar is so cheap soon we wonâ??t need dirty gas stations.
We need a president who cares â?!.
We donâ??t need yet more methane flares!
We must kick out Trump and his cronies whose hearts are so damn cold
theyâ??re selling off all future life for a few more bars of gold!
We are the new progressives We are no longer passive!
Our backbones are made of steel
(very slow & loud) and WE DEMAND THE GREEN NEW DEAL
NOW!!!
